Summary

Product designer with 5 years owning features end to end within B2B SaaS and AI platforms, from problem definition and research through production-ready specs and developer handoff. Designs the interface layer of AI products with a trust-first lens: source attribution, human-in-the-loop review, and graceful states for errors and edge cases, so people can act on an AI recommendation with confidence. Contributes to and governs design systems rather than working around them, and treats AI tools like Claude, Cursor, and Midjourney as a native part of the workflow, not a bolt-on.

Skills

UX Design	Product Design, UI/UX Design, Interaction Design, Information Architecture, User Flows, Wireframing, Prototyping
Research	User Research, Usability Testing, Competitive Research, Heuristic Evaluation
AI Product Design	AI Product Design, Conversational AI UX, Human-in-the-Loop Design, Explainability Design, Source Attribution Design, AI Trust Architecture
AI Tools	AI-Augmented Design Workflow, Prompt Engineering, Vibe Coding, Claude, ChatGPT, Cursor, GitHub Copilot, Midjourney
Design Systems	Design Systems, Component Libraries, Design Tokens, Auto-Layout, Variants, Design System Governance, Accessibility Awareness
Tools	Figma (Components, Variables, Auto-Layout, Dev Mode, Prototyping, FigJam), Adobe Illustrator, Adobe Photoshop, HTML, CSS, Basic JavaScript
Collaboration	Cross-Functional Collaboration, Stakeholder Management, Design Critique, Discovery Facilitation, Developer Handoff (Figma Dev Mode), Design QA, Agile Delivery
Domains	B2B SaaS, Enterprise Software, AI Platforms, Government Contracting, Observability and Monitoring, Health Tech, Fintech

Experience

RedCrackle

UI/UX LEAD

Remote

Sep 2021 - Aug 2026

- Designed a B2B **AI** contract intelligence platform end to end for a US government contracting firm, attaching **source attribution** to every AI-generated insight and keeping a **human in the loop** on every contract decision, cutting time spent searching and validating opportunities by **48%**.
- Built and governed a 25+ component **design system** in **Figma** with documented variants, auto-layout, and a global theme for a no-code website builder, achieving a **76% component reuse rate** and ending recurring "which version do I use" questions from engineering.
- Ran **usability testing** on a developer documentation platform for MuleSoft that invalidated the original navigation assumption, then rebuilt the **information architecture** around observed behaviour, increasing **search success rate from 48% to 72%**.
- Designed an enterprise **observability dashboard** with two distinct views, a management summary and a developer diagnostic breakdown, specifying every service state (healthy, degraded, failing, loading, empty) with **engineers** before build started.

The Subtle Things

FREELANCE PRODUCT DESIGNER

Remote

2022 - Present

- Designed a multi-step **AI** health companion flow, pushing back on a brief for instant AI output in favour of a questionnaire-first **trust architecture**, keeping the source of every recommendation visible and adding explicit consent and a disclaimer before each AI output.
- Ran an **AI**-augmented design sprint across 8 tools including **Claude**, **Cursor**, and **GitHub Copilot**, designing every state (empty, loading, data-filled, error) and shipping a complete fintech app design with a working **HTML**, **CSS**, and **JavaScript** prototype in 10 days.
- Delivered a stronger, unbriefed version of a health **e-commerce** homepage built around trust signals the original brief did not call for, and the client shipped it after **conversion rate increased from 3% to 21%** following launch.

Daystar Growth

HEAD OF DESIGN

Remote

2023 - 2025

- Established the **brand identity**, visual system, and design standards from scratch as the first designer in a growth consultancy that had no design function, reporting to the CEO on brand positioning and client-facing work.

Zariin Jewelry, Roma Narsinghani

DESIGN INTERN

India

2020 - 2021

- Designed social media assets and the Men's Money Clip collection for a premium jewelry brand in **Adobe Illustrator** and **Photoshop**, and built 3D product prototypes in Rhino 3D.

Education

National Institute of Fashion Technology (NIFT)

B.DES, FASHION AND LIFESTYLE ACCESSORIES (JEWELRY AND ACCESSORY DESIGN)

India

2017 - 2021

Certifications

- 2021 **Google UX Design Certificate**, Coursera
- 2026 **Generative AI Bootcamp**, Outskill / GrowthSchool
- Government Certification in Generative AI**
